Introduction

On March 11, 2020, the World Health Organization characterized [COVID-19](#) as a pandemic. [Thousands of COVID-19 cases](#) have been confirmed in Ontario to date. The resource, [COVID-19: Clinical and Practical Guidance for Primary Care Providers](#), and a [curated list](#) of evidence-based supports, were developed to assist Ontario providers in assessment and testing, management, operations, PPE, infection protocol, and other areas impacting primary care due to the pandemic.
