

Sheila Harms, MD, FRCP(C), PhD (Candidate)

HEALTH SCIENCES
Psychiatry & Behavioural
Neurosciences

Research Work

My research interests are primarily in the domain of medical education, using qualitative or mixed methods to explore various aspects of current phenomenology. Current projects include:

- Evaluation of the One Room School House as a pedagogical innovation in distributed campus medical education using mixed methods
- Conducting surveys about the implementation of Competence by Design within the general Psychiatry program
- Describing the McMUST partnership that has been established with colleagues in Uganda
- Supporting residents to engage in qualitative research projects

Engagement Opportunities

Introductory Level

- Literature Reviews
- Curriculum Development for the One Room Schoolhouse
- Assisting with data review and entry
- Brainstorming

Intermediate Level

- Assisting with some data analysis
- Write sections of proposal
- Write sections of papers for publications
- Engaging in some qualitative analysis
- Write conference abstracts

Advanced Level

- Doing large amounts of data analysis
- Writing large segments of papers
- Doing large amounts of qualitative analysis
- Writing up a poster based on findings
