

CBME

Newsflash #17!

Dispelling **MYTHS OF CBME**

Psychiatry residency will still be 5 years

**Rotations will still be defined durations,
the same for all residents.**

**Rarely will a resident advance at faster rate.
If a resident is struggling, residency could be
extended, same as now.**

EPAs are only a portion of CBME assessment

Other evals, such as ITARs, will still be used

**CBME should occur in parallel to daily,
clinical work**

**EPA assessments will not need to be done
every day**
